

First Annual PRVOUK P42 Meeting, February 6th, 2013

Lecture hall CH2

9:00 – 9:05	<i>Tomáš Obšil</i>	Opening
9:05 – 10:00	<i>Jana Roithová</i>	Hmotnostní spektrometrie ve výzkumu reakčních mechanismů.
10:00 – 10:30	<i>Jakub Hraníček</i>	Construction of new miniaturized electrochemical flow-through cells for generation of volatile compounds of selected elements for atomic absorption spectrometry.
10:30 – 11:00	<i>Karel Škoch</i>	Synthesis and Catalytic Evaluation of C-Chiral Ferrocenophane Phosphines.
11:00 – 11:10		<i>Break</i>
11:10 – 11:40	<i>Václav Martínek</i>	What makes cytochromes P450 1A1/2 potent nitroreductases?
11:40 – 12:10	<i>Peter Košovan</i>	Seawater desalination using hydrogels.
12:10 – 12:40	<i>Petr Šmejkal</i>	MBL and experiments supported by computer in chemistry education at secondary schools.
