

Ústav geologie a paleontologie zve všechny zájemce na **obhajobu disertační práce RNDr. Jana Geista**, která se koná v pátek **27. června 2025 od 10:00 v Chlupáčově pracovně Albertov 6, přízemí dveře P19A**

Jurassic and Lower Cretaceous belemnites like proxy markers of stratigraphy and paleoecology

RNDr. Jan Geist

The thesis focuses on the study of little-known Jurassic strata within the Bohemian Massif and partly on the J/K transition in Central Europe. Based on the preserved belemnite fauna (+ ammonites, Cannanofossils and complementary geochemical analyses) the stratigraphy, paleobiogeography and paleoecology are reinterpreted in a European context.

Ph.D. Thesis (2025)
supervisor: prof. RNDr. Martin Košťák, Ph.D.
consultant: RNDr. Lucie Vaňková, Ph.D.
