

Instructions for students: Thesis check in Turnitin system using SIS

If you need to check your final thesis in Turnitin system, you can do it directly via the Study Information System (SIS). To check, follow these steps:

1. Log in to the [SIS](#)
2. Open the Thesis (Selection of subject) module
3. Select your thesis at the bottom of the page
4. Go to the Edit tab
 - 4.1. Use the "Add file" section to upload the file you want to check
 - 4.2. After adding the file, you should see the file in the "Uploaded thesis files" section.
 - 4.3. There is a yellow triangle icon in the "Turnitin Check Status" column to submit the thesis for a plagiarism test before finalisation of the thesis.

- 4.4. After checking, there is a PDF icon in the "Turnitin check status" column to download the protocol.

Before submitting the work, you can check up to 5 times. It is ensured that files checked by this procedure will not be included in the final check after finalisation of the thesis.

The bulk export of theses from the SIS to be checked at Turnitin takes place several times a day. The check itself in the Turnitin service may take several minutes.
