

PROGRAM SEMINÁŘŮ

Zimní semestr školního roku 2018/2019

2.10.	Sebastien Lavergne	Laboratoire d'Ecologie Alpine, Université Grenoble Alpes	The evolutionary and ecological assembly of high alpine plant communities
9.10.	Lucio Montecchio	Department of Land, Environment, Agriculture and Forestry, Univ. of Padova, Italy	Amenity trees protection: a common responsibility
16.10.	John Birks	Department of Biological Sciences, University of Bergen	Quaternary biology's major conundrum - extinctions, adaptation, speciation, migration
23.10.	Clément Lafon-Placette	katedra botaniky PřF UK	Sexual selection and/or sexual conflict, main actors in plant evolution?
30.10.	Kristjan Zobel	Department of Botany and Ecology, Tartu University	Plant performance as related to the identity and frequency of neighbour species
6.11.	Lucia Muggia	University of Trieste, Department of Life Sciences	An integrative taxonomic approach to reappraise the complexity of lichen symbioses
13.11.	David Storch	Centrum teoretických studií UK a katedra ekologie	Neznámá známá nosná kapacita prostředí: Regulace počtu jedinců v populacích a druhů ve společenstvech v proměnlivém světě
20.11.	seminář UNCE		
27.11.	Jürg Schönenberger	Department of botany and biodiversity research, University of Vienna	The eFLOWER initiative: A framework for understanding the evolution and diversification of extant and fossil flowers
4.12.	Johanna Leppälä	Department of Biosciences, University of Helsinki	Postzygotic reproductive isolation at different levels of genetic divergence
11.12.	Tanja Slotte	Science for Life Laboratory, Stockholm university	Genetic causes and genomic consequences of plant mating system variation
18.12.	<i>flash presentations</i>		Zdeněk Janovský, Miroslav Kolařík, Patrik Mráz, Roswitha Schmickl, Jana Veselá
8.1.	<i>PhD students seminar</i>		Alžběta Böhmová: Evolution and systematics of Asian Costaceae with focus on the intraspecific relationships of <i>Cheilocostus speciosus</i> complex; Andrea Veselá (Paulů): Interspecific and intraspecific variability in germination; František Sklenář: Taxonomic revision and study of osmotolerance of osmophilic subgenus <i>Aspergillus</i> ; Alice Moravcová: Disturbance dynamics of mountain forest and lake ecosystems since the late glacial: a multi-proxy approach; Anna Tichá (Poštulková): Diatom analysis as a tool to reconstruct paleoenvironment from lacustrine sediments

Semináře se konají vždy v úterý v 15 hod. na katedře botaniky PřF UK, Benátská 2, Praha 2 v Krajinově posluchárně ve 2. mezipatře, pokud u jednotlivých seminářů není uvedeno jinak.

HOSTÉ VÍTÁNI!

Yvonne Němcová, vedoucí katedry
