

PROGRAM SEMINÁŘŮ

Letní semestr školního roku 2023/2024

- | | | | |
|-------|------------------------------|--|---|
| 20.2. | <i>flash presentations</i> | | Adéla Pokorná, Martina Pichrtová, Martha Kandziora, Patrik Mráz, Roswitha Schmickl, Martin Weiser |
| 27.2. | <i>Ph.D students seminar</i> | | Sayantika Banerjee: Impact of climate on root biota and role of root biota in plant performance under changing climate; Martin Prach: Origin and long-term survival of Central European populations of larch (<i>Larix decidua</i>): combining phylogeography, paleoecology and niche modeling approaches; Anna Větvičková: Long-term vegetation dynamics in Central European xerotherm grassland vegetation |
| 5.3. | Hana Šantrůčková | University of South Bohemia, Department of Ecosystem Biology | Carbon rules them all, Carbon binds them all. A story of the effect of carbon availability on nitrogen leaching from spruce forest soils |
| 12.3. | Petra Šarhanová | Plant Biosystematics Group, Masaryk University | Rare events in plant reproduction - what flow cytometry hides |
| 19.3. | <i>poster session</i> | | |
| 26.3. | Jan Ponert | Department of Experimental Plant Biology, Charles University | Pleurothallidinae: insights into evolution and diversity of the largest orchid subtribe and possible influence of repetitive elements |
| 2.4. | Jakub Hruška | Czech Geological Survey | Factors controlling spread of forest fire in NP Czech Switzerland (and a quick glance at ongoing nature regeneration). |
| 9.4. | Martin Čertner | Department of Botany, Charles University | What we (still) don't know about polyploid speciation |
| 16.4. | Miroslav Kolařík | Department of Botany, Charles University and Institute of Microbiology CAS | Integrative approach in the study of fungal taxonomy, ecology and biogeography |
| 23.4. | Klára Klinkovská | Vegetation Science Group, Masaryk University | Changes in Czech flora and vegetation over the last decades: winners, losers and causes of changes |
| 30.4. | <i>UNCE seminar</i> | | TBA |
| 7.5. | Daniel Laughlin | University of Wyoming, Department of Botany | Completing the cathedral: the fundamental niche and other hard problems in ecology |
| 14.5. | Martina Janoušková | Institute of Botany CAS | Diversities in arbuscular mycorrhiza |

Everybody is welcome! We expect all master and PhD students to take part.
